

link of research paper

If you mean the **research paper link for your submission form**, the PDF currently exists as a downloadable file, but it does **not yet have a public URL**.

Here is the PDF:

For your form, a **public Google Drive/GitHub link** is better. If you want, I can ↪ **guide you step-by-step to upload this PDF to your GitHub repository and create a public research-paper link**.

KPop\_Chart\_Intelligence\_Research\_Paper\_Krishika\_S...  
PDF

Guide me step-by-step to upload this PDF to my GitHub repository and create a public research-paper link

Yes. We'll upload the PDF to your existing GitHub repository and then use the **GitHub file link** in the research-paper field.

## Step 1 — Download the PDF to your Mac

Click this first:

Save it in your **Downloads** folder.

Once it is downloaded, tell me **"done"**. Then I'll give you **only the next step**.

KPop\_Chart\_Intelligence\_Research\_Paper\_Krishika\_S...  
PDF

done

## Step 2 — Open Terminal

Open **Terminal** on your Mac.

Then run this exact command:

```
</> Bash
```

```
cd ~/Downloads
```

Press **Enter**.

After that, tell me **"done"**.

done

### Step 3 — Copy the PDF into your project folder

Run this exact command:

```
</> Bash
```

```
cp ~/Downloads/KPop_Chart_Intelligence_Research_Paper_Krishika_Sonwane_Revised.pdf ~/Down
```

Press **Enter**.

Then tell me **"done"**.

done

### Step 4 — Go into your project folder

Run this exact command:

```
</> Bash
```

```
cd ~/Downloads/new2
```

Then run:

```
</> Bash
```

```
ls -lh KPop_Chart_Intelligence_Research_Paper_Krishika_Sonwane_Revised.pdf
```

You should see the PDF listed with its file size.

Send me the output (or a screenshot), and I'll give you the next command. GitHub supports adding an existing file through the command line with `git add`, `git commit`, and `git`

➤ ls -lh

KPop\_Chart\_Intelligence\_Research\_Paper\_Krishika\_Sonwa  
ne\_Revised.pdf

ls:

KPop\_Chart\_Intelligence\_Research\_Paper\_Krishika\_Sonwa  
ne\_Revised.pdf: No such file or directory

📁 ~/Downloads/new2 📁 main ?1 📁

No problem — the filename in your Downloads folder is probably slightly different.

## Step 5 — Find the actual PDF filename

You are already in:

⌕ Plain text

~/Downloads/new2

Run this exact command:

⌕ Bash

ls -lh ~/Downloads/\*.pdf

This will show **all PDF files in your Downloads folder**.

Send me what it shows. **Don't move or rename anything yet.** I'll give you the exact next command based on the filename.
